

CLEANING

Product	Description	Colour	Applications	Substrates	Features
DEKACLEAN ULTRA	Universal cleaning agent	Transparent	Cleaning and degreasing substrates before bonding and sealing	Aluminium, steel, copper and brass, lacquered powder-coated metal, lacquered metal, (ceramic-coated) glass, polyester (GRP), ABS, PVC, polyurethane	<ul style="list-style-type: none">Quick-dryingCleans the surface thoroughly, leaving it completely dry and free from residueHighly concentrated and efficient
DEKAVATOR 22 NF	Adhesion promoter	Transparent	Improves adhesion of DEKASYL products on closed substrates	Plane aluminium, ABS, ASA, polyester (GRP), other plastics	<ul style="list-style-type: none">Fast drying: Flash-off time approx. 5 minutesImproves adhesion on closed substratesEconomical consumptionUV-traceable
DEKAFINISHER	Ready-to-use smoothing agent for sealing joints	Transparent	Smooths freshly bonded/sealed exposed joints	Suitable for adhesives and sealants, based on MS polymers Silicones and polyurethanes	<ul style="list-style-type: none">Perfect finishReady-to-useProtects joints from discolouration
DEKARUST REMOVER	Power rust remover	Transparent	High-quality, lubricating rust remover – through state-of-the-art technology	Metals	<ul style="list-style-type: none">Unique active formula, dissolves rust and encrusted grimeImmediately penetrates difficult-to-reach placesSuitable for all corroded surfacesNo silicones, no mineral oilsNo substances that impair paint wettingEconomical to use
DEKACLEAN GLASS FOAM	Active foam cleaning spray	Transparent	Windscreens and mirrors (Not suitable for acrylic and polycarbonate windows)	Glass	<ul style="list-style-type: none">Unique active formulaStreak-free cleaning effectEasy removal of road dirt and insectsRemoves nicotine and silicone

BONDING & SEALING

Product	Description	Colour	Applications	Substrates	Features
DEKASYL MS-1	MS polymer elastic adhesive and sealant	Black, Grey, White	Highly adhesive sealant for side skirt cladding, frames, wheel covers	PVC, glass, aluminium, paints, galvanised steel, polyester	<ul style="list-style-type: none">Excellent UV resistance and ageing propertiesNo special surface treatment necessaryCan be coated over after skin formation
DEKASYL MS-2	MS polymer elastic adhesive and sealant	Black, Grey, White	Multi-functional adhesive and sealant for glass and PMMA windows, side skirt cladding, frames, wheel covers	PMMA, PVC, glass, aluminium, paints, galvanised steel, polyester	<ul style="list-style-type: none">Excellent UV resistance and ageing propertiesNo special surface treatment necessaryCan be coated over after skin formation
DEKASYL MS-5	MS polymer High tack adhesive and sealant	Black, White	Power adhesive for structural applications, satellite systems, solar modules, spoilers, roof ducts, etc., glass and PMMA windows	PMMA, PVC, glass, aluminium, paints, galvanised steel, polyester	<ul style="list-style-type: none">Excellent initial tackExcellent UV resistance and ageing propertiesNo special surface treatment necessaryCan be coated over after skin formation
DEKASYL MS-6	MS Polymer elastic sealant and adhesive	Black, White	All internal and external sealings. Bondings where no high bond strengths are required	Most plastics, metals, glass etc.	<ul style="list-style-type: none">Excellent adhesion without special pretreatmentExcellent UV- and weathering resistanceMould resistant
DEKASYL MS-7	Crystal clear MS polymer, adhesive and sealant	Crystal clear	Sealing and bonding in interior areas (kitchens, bathrooms) and suitable for outside applications	PVC, glass, aluminium, paints, polyester	<ul style="list-style-type: none">Neutral, odourless and fast-curingNo special surface treatment necessaryColor stable (very good UV resistance), non-yellowing
DEKASYL MS-8	MS Polymer elastic windscreen adhesive	Black	Glass and PMMA windscreens, bonding where a high initial tack is needed	Glass with ceramic frit, glass, PMMA, PC, metals	<ul style="list-style-type: none">Very high green strength (initial tack)No special surface treatmentVery good UV-resistance and ageing properties1 hr drive away time (FMVSS212 crash test)
DEKASYL 240	Quick curing 2C elastic adhesive	Light grey	Windows, trims, wheel housings, spoilers, flaps	PVC, polyester, aluminium, paints, glass, galvanised steel	<ul style="list-style-type: none">Quick curing: Vehicles can be moved after 2 hoursLong workability period of 30 minutesSuitable for any standard cartridge gun

SEALING

Product	Description	Colour	Applications	Substrates	Features
DEKASEAL 8936	Polyisobutylene sealing material	Anthracite grey, Black, Light grey	Windows, doors, hatches frames, sockets, lights	Paints, aluminium, ABS, PMMA wood, plywood	<ul style="list-style-type: none">Very low moisture permeabilityExcess material can simply be removed by dabbing with the same materialSealant must be used together with mechanical fasteningsCannot be coated
DEKASEAL 1512	Butyl sealing compound	Cream White, Black	Drill holes, openings, doors exterior surfaces, roof hatches, roof hoods, cover strips, hose ducts	Paints, aluminium, ABS, PMMA, wood	<ul style="list-style-type: none">Can be used as a sealing material inside and outsideOptimal for filling beads in vansCan be coated due to skin formation
DEKAPLAST 7303	Butyl tape	Light grey	roof hatches, cover strips, roof hoods, bores, openings	Paints, aluminium, ABS, PMMA, wood	<ul style="list-style-type: none">High-quality barrier against water and humidityExcellent ageing propertiesGood adhesion to many substrates without pre-treatmentNo curing necessary, reaches final strength immediately

PROTECTING

Product	Description	Colour	Applications	Substrates	Features
DEKAPHON 9735	Breathable underbody protection	Black	Underbody repair Wheel housings Underbody protection	Plywood, wood	<ul style="list-style-type: none">Does not produce atomised spray when appliedSound-absorbing propertiesExcellent resistance to water and abrasion
DEKAPHON 958	Breathable solvent-free underbody protection	Black	Wooden floors, wheel housing shells, side panels, chassis	Wood, plywood, metal, plastics	<ul style="list-style-type: none">Water-based productExcellent resistance to water and abrasionExcellent wood impregnationExcellent primer for MS adhesives
DEKAPHON PRO-WAX	Multi-purpose wax for corrosion protection	Transparent	Corrosion protection for cavity areas and underbodies	Most clean, dry, dust- and grease-free substrates	<ul style="list-style-type: none">Excellent corrosion protectionHigh temperature resistanceFree from aromatic compoundsLow odour

BONDING & REPAIRING

Product	Description	Colour	Repairing	Substrates	Features
DEKAPUR 2K-6000	Structural adhesive	Beige	Side panel bonding	Plywood, aluminium, polyester, polystyrene wood	<ul style="list-style-type: none">No solvents, non-foamingNo long fixing necessary (max. 5 to 8 hours)
DEKAPUR 2K-90	2K-Polyurethane adhesive Plastic repair	Black	Plastic repair of decorative trims, wheel covers and rear side skirts	ABS, PMMA, plywood, wood	<ul style="list-style-type: none">Very fast curing, 5 minutes!Easy and cost-efficient repair
